

PARTNER ONE-PAGER

The engineer behind your agency's harder projects

You win the project; I build the part your team doesn't do every day — the Laravel or Go backend, the integration, the server, the migration or the AI feature — under your brand, at a fixed price you can quote with confidence.

HOW IT WORKS

Send a brief. You get a written scope and a fixed price in one business day. I work in your repo and tools, update you twice a week, and hand over docs without my branding.

WHAT YOU KEEP

The client relationship, the margin and the credit. I never contact your client unless you ask. Code and IP transfer on final payment.

HOW TO START

One small paid job — an assessment, a server setup or a single feature. If it goes well, we talk about the next one.

AI LISTINGS IN USE

WHAT AGENCIES HAND OFF**Laravel & Vue/Nuxt features and apps**

Modules, admin areas, real-time features and subscription billing (Stripe), built with tests.

Integrations

Third-party APIs, webhooks, data feeds and store sync, with retries and clear failure handling.

Servers, deploys and migrations

Hardened VPS setup, Docker, CI/CD, hosting moves with a rollback plan, backups with a tested restore.

Backend APIs in Go or Python

Documented endpoints, authentication, background jobs and a Docker image ready to deploy.

AI features

LLM features with validated output and guardrails, vision and document extraction, search over your client's data.

Upgrades and rescue

Laravel and PHP/Python/Node end-of-life upgrades, codebase assessments and stabilizing inherited projects.

PARTNER TERMS

Same fixed prices as on my site, invoiced to you in USD by bank transfer; you bill your client as you like. US Eastern business hours, written async updates, no 24/7 on-call — stated upfront so you can price it in. A 10% finder's fee if you send me a client you don't want to resell.

STACK

Laravel	PHP	Vue / Nuxt	Go	Python
